Who We Are

Since 2002, CBT Associates has helped people become happier and more productive by assisting clients in overcoming feelings and behaviours that negatively impact their everyday lives. Dr. Peter Farvolden and Dr. Eilenna Denisoff were previously working in the Mood and Anxiety Program and the Clinical Research Department at the Centre for Addiction and Mental Health (CAMH). They opened their practice together in response to the overwhelming demand they saw for high-quality and evidence-based psychological treatment.

Evidence has demonstrated that Cognitive Behavioural Therapy (CBT) is effective in helping people to overcome a variety of problems and achieve a healthier and more balanced approach to life. However, access to this treatment has, historically, been a challenge. Over the past decade, Drs. Denisoff and Farvolden have expanded their practice to meet this need and today they work with a growing group of over 70 like-minded psychologists to provide effective, efficient, evidence-based treatment at 6 locations in the Greater Toronto Area, including Aurora, Unionville, Etobicoke, North York, Midtown Toronto and Downtown Toronto. They have found that this group practice approach allows them to provide access to the broadest base of clinical expertise and provide a tailored approach for the best outcomes.

Today, CBT Associates provides personalized, compassionate, respectful and discreet treatment with the highest level of professional care, focusing on leading-edge, evidence-based Cognitive Behavioural Therapy to help children, adolescents and adults of all ages in sessions for individuals, groups, couples, and families. The spirit of our approach is active, compassionate, and genuine. We collaborate with clients and develop a treatment plan that works for them.

As psychologists, we are trained to be scientist-practitioners. This means that our practice is guided by the best evidence provided by current research on what works for common problems. The treatments and techniques we employ have been shown to be most effective in reducing symptoms and improving the quality of life for people experiencing anxiety, mood, stress, and relationship problems. Through our evidence-based practice, we strive to integrate the best research and evidence with our clinical expertise and our clients' values.

Philosophy of Training

The Clinical Psychology Residency Program is committed to the Scientist-Practitioner model, which is reflected through the use of Cognitive Behavioural Therapy (CBT) as our main treatment modality.

Research has indicated that the way we think and behave powerfully affects our emotions. CBT helps clients change their negative and anxious thoughts and behaviours, so they can feel and function better, in order to improve quality of life. Rigorous clinical trials have proven that CBT is effective in improving symptoms of depression, anxiety, psychosis, amongst others conditions.

Through an evidence-based education, Residents will learn how to collaborate with clients to design personalized case conceptualizations and treatment plans that may also integrate a number of related therapeutic approaches. These include, but are not limited to, Motivational Interviewing (MI), Acceptance and Commitment Therapy (ACT), Mindfulness Meditation, Mindfulness-Based Stress Reduction (MBSR), Mindfulness-Based Cognitive Therapy (MBCT), and Dialectical Behaviour Therapy (DBT). Residents within our program are encouraged to anchor their clinical service in a thorough review of existing scientific literature and evaluate their interventions systematically.

CBT Associates is committed to assisting Residents in developing advanced clinical skills in CBT, and to providing effective and evidence-based treatment to clients. This immersive experience will ensure that Residents develop assessment, treatment, consultation and ethical skills to prepare them to work as independent practitioners.

Goals of Training

The primary aim of the CBT Associates Clinical Residency Program is to prepare Residents to become competent and autonomous Clinical Psychologists. Residents will develop skills and knowledge in the areas of diagnosis, assessment, consultation, treatment, as well as professional and ethical issues. Residents are expected to think critically not only about the services they offer to patients but also about the clinical decisions they make. These decisions are based upon data collected in the therapeutic and assessment context and be informed by empirically supported research. As such, Residents are expected to develop core competencies in the following areas:

1. **Assessment** – Assessments are conducted to develop each Resident’s competence in assessment, diagnosis, case conceptualization, and to provide recommendations for treatment and interventions. The expectation is that Residents will become proficient with the psychological assessments that are specific to their training rotations including the administration, scoring, interpretation, and communication of results from diagnostic interviews and psychological tests.
2. **Consultation and Interprofessional Collaboration** - Residents are expected to develop the personal skills and attitudes necessary for practice as a psychologist within a multidisciplinary framework, including oral and written communication skills, consultation skills, and the ability to work competently with other healthcare professionals.
3. **Intervention** - To ensure that Residents are competent in planning and providing a range of psychological treatments through individual, group, and family-based interventions. Residents will understand the basis of treatment formulation including empirically supported interventions, development of treatment goals, and psychotherapeutic strategies. Residents will demonstrate an understanding of the process issues related to intervention.
4. **Professional Ethics and Standards** - Training aims to ensure that Residents develop awareness, knowledge, and application of ethical and professional principles of psychology in clinical activities so that they will aspire to the highest ethical and professional standards in future professional roles. Residents are expected to demonstrate a comprehensive knowledge and a keen sensitivity to professional ethics in terms of ethical standards, codes of conduct, different legislation relating to psychology and obligations under the law. Training aims to help prepare Residents for registration with the College of Psychologists of Ontario, as well as other state and provincial licensing boards.

5. **Cultural Diversity** - Residents are exposed to patients and staff from diverse cultural backgrounds. Training focuses on becoming aware and sensitive to cultural and individual differences in the context of their work as psychologists.
6. **Professional Development** - Educational events at CBT Associates are held on a regular basis, and Residents are required to attend. Educational opportunities include in-house trainings, CBT skills focused rounds, clinical rounds, assessment rounds, disability management rounds and supervision rounds. Residents are expected to participate in active learning by conducting and attending presentations and seminars, as well as keeping abreast of current literature.
7. **Research** - To enhance the scientist-practitioner approach by training Residents in evaluation research, and exposing them to other forms of clinical research within a clinical setting.
8. **Supervision and Evaluation** - Supervision is provided by staff licensed to provide psychology services in the province of Ontario. As indicated in the Canadian Psychological Association (CPA) guidelines, a minimum of four hours of supervision per week is provided to Residents by doctoral level psychology staff. Supervision is structured in order to meet the Resident's level of competence. Supervision activities are individualized to each Resident's specific training needs and entry-level skills, and will include both group and individual supervision. As Resident's competence increases, supervision becomes more consultative and collaborative in nature. Residents are evaluated on their progress at intervals of three months, six months and twelve months by their Supervisors. Feedback will be provided to the Resident's Director of Training at six and twelve months.
9. **Development of Supervisory Skills** - Residents may have the opportunity to provide supervision to junior therapists. If Residents pursue these experiences, they receive guidance from their Clinical Supervisor. Additionally, Residents will gain knowledge of the literature that is available on supervision through readings.

Program Structure

The Clinical Residency Program will run from September 1 through August 31 (i.e., first business day in September to the last business day in August), and requires the completion of 1700 - 2000 hours of supervised practice. We have three Resident positions available. Residents will be expected to work 37.5 hours per week, with specific hours to be determined at the outset of the Residency in collaboration with the Resident's Clinical Supervisors and Director of Clinical Training. Residents will be required to work at least two evenings per week between 5 p.m. and 9 p.m.

Residents will spend at least two days at the downtown location, currently Wednesdays and Thursdays, to participate in didactic rounds and group supervision treatment rounds. Residents may be asked to work at more than one CBT Associates location. Services provided by residents would be similar at all locations. Residents are assigned to these locations based on preference and referral volume. Administrative supports are available at each location.

Residents will spend a minimum of 50% of their Residency in direct client contact (approximately 20 hours per week). Clinical contact may also include work through BEACON™, which is a new digital platform developed by CBT Associates to enhance traditional in-person CBT sessions, and provide a standalone internet-based CBT approach, providing evidence-based protocol-driven treatment under the guidance of a therapist.

In addition to their clinical work, Residents will also participate in report-writing, clinical readings, educational and didactic seminars, and supervision. Residents may also have the opportunity to work on research projects within the clinic, such as analyzing outcome data for our new digital platform.

Each Resident will receive a minimum of four hours of supervision per week by a doctoral-level, registered psychologist. Clinical supervisors are available across locations, and would supervise residents at, and across, locations. Styles of supervision will vary between supervisors, and may include discussion of clinical cases, professional development and mentorship, observing and being observed while providing clinical services, video or audio recording of sessions, and formal case presentations. Residents will be assigned a minimum of two supervisors based upon their expression of interest and availability of the Supervisor. Both Supervisors meet weekly with each Resident. An additional group supervision session, "Treatment Rounds", occurs weekly, as well. Supervision may be provided in individual and/or group formats, in addition to attending weekly interdisciplinary team meetings, psychology seminars, and case conferences.

Supervisors provide a graduated experience of increasing autonomy, depending upon the experience and comfort level of the individual Resident. Residents are encouraged to dialogue with their supervisors as to when they feel ready to take on more autonomy, or if they have been given too much. Built into the program is also the ability for the Residents to be supervised on their supervision of junior practitioners.

Successful completion of the residency involves:

- Completion of 1700-2000 hours
- Completion of a minimum of two comprehensive reports (e.g., psychodiagnostic or psychoeducational)
- Participate in at least one group treatment (e.g., MBCT or DBT Skills groups)
- Case presentation in the CBT rounds
- Participation in training seminars
- Evaluation by the primary and secondary supervisor around readiness for supervised practice

Didactic Seminars

Residents will be required to attend a number of didactic seminars over the course of the Clinical Residency.

Weekly assessment rounds are one hour in length, and are focused on diagnostic assessment, ethics, case presentations and didactic presentations.

Monthly CBT skills-based rounds focused on specific CBT strategies, are two hours in length, and include discussions around the theory and application of evidence-based therapeutic strategies.

Residents are also required to attend monthly training sessions that are focused on the development and enhancement of CBT skills for numerous clinical conditions. These training sessions are two hours in length.

In total, the didactic training averages to two hours of training per week of the residency.

Clinical Rotations

Residents within our program will anchor their clinical service in a thorough review of existing scientific literature on empirically-validated treatments, and evaluate their interventions systematically. Residents will focus on developing their skills in *Assessments, Intervention and Consultation*.

Although *assessments* may vary depending upon the specific referrals, in general, Residents will be expected to demonstrate proficiency in psychodiagnostic assessment with structured clinical interviews, as well as behavioural, personality, and cognitive assessment measures, where appropriate. Our model of training allows for experience with diverse clinical populations and presentations.

Regarding *intervention*, Residents at CBT Associates will develop proficiency in the use of empirically and theoretically based approaches to therapy with a diverse client population specific. This will include supervision and training in various psychotherapy modalities and may include individual, group, and in some cases, couples or family therapy. Although CBT training will be the primary modality of treatment and training, other forms of therapy may be incorporated into the training program, such as DBT, MBCT and ACT.

Concerning *consultation*, Residents are expected to develop the personal skills and attitudes necessary for practice as a psychologist within a multidisciplinary framework, including oral and written communication skills, consultation skills, and the ability to work competently with other healthcare professionals. Residents may be involved in interacting with professionals within CBT Associates and with professionals from community agencies regarding the care and treatment of patients. This also provides Residents with an opportunity to engage in the multiple roles of a psychologist including clinician, teacher/supervisor, evaluator/researcher, administrator, and leader.

The Clinical Residency Program has been segmented into several rotations based on client populations. All Residents will be required to complete clinical work within the Adult Mental Health rotation. Residents may also elect to complete additional training in the Child and Adolescent Mental Health and BEACON™ rotations.

Clients will be assigned to Residents on the basis of their clinical interests, as well as the availability of referrals.

ADULT MENTAL HEALTH ROTATION

In this rotation, Residents will work with clients, aged 18 to 65 years old, from diverse backgrounds and clinical presentations. Often referrals include individuals suffering from Major Depressive Disorder, Bipolar Disorder, Schizophrenia, Substance Abuse Disorders, Panic Disorder, Agoraphobia, Specific Phobias, Social Anxiety Disorder, Generalized Anxiety Disorder, Illness Anxiety Disorder, Obsessive Compulsive and related disorders, Post-traumatic Stress Disorder and related disorders, and Eating Disorders. Clients may also present regarding issues related to grief, relationships, stress, and occupational difficulties, among other stressors.

CHILD AND ADOLESCENT MENTAL HEALTH ROTATION (MINOR ROTATION)

In this rotation, Residents will work with clients, aged 5 to 17 years old, Often referrals include individuals suffering from Attention Deficit Hyperactivity Disorder (ADHD), Learning Disabilities, Major Depressive Disorder, Substance Abuse Disorders, Panic Disorder, Agoraphobia, Specific Phobias, Social Anxiety Disorder, Selective Mutism, Generalized Anxiety Disorder, Illness Anxiety Disorder, Separation Anxiety Disorder, Obsessive Compulsive and related disorders, Post-traumatic Stress Disorder and related disorders, and Eating Disorders. There may also be opportunities to conduct psychoeducational assessments for ADHD and Learning Disabilities, giftedness, developmental delays and autism spectrum disorders.

BEACON™ ROTATION (MINOR ROTATION)

In this rotation, Residents have the opportunity to be involved in assessments and treatment through our BEACON platform, which is a Therapist-Assisted internet Cognitive Behavioural Therapy (TAiCBT) platform. TAiCBT involves using digital technology to administer diagnostic assessments and to deliver protocol-driven evidence-based treatment tools (e.g., psychoeducation, skills training, homework, outcome measures) to clients. Clients are assisted in using these tools by the therapist, who provides tailored feedback and support via secure messaging and phone calls.

Resident Evaluation

Formal written evaluations will be conducted three times over the course of the Residency; at three months, six months and twelve months. Results of the written evaluations are forwarded to each Resident's University at six and twelve months to document his or her progress in the Clinical Residency.

The initial written evaluation is completed by each supervisor. It is reviewed in a face-to-face meeting with the Resident. This review is intended to identify areas of strengths and/or weaknesses that can be further developed through the remainder of the Residency.

The second evaluation is conducted at the mid-point of the year. The evaluation occurs in a face-to-face meeting with the Supervisor and Resident. This evaluation is based on the findings of the initial written evaluation and progress from stated goals and objectives of the Resident.

A final meeting between the Resident and Supervisor is conducted at year end to discuss the overall evaluation of the Resident's progress over the course of the Residency. This evaluation is based on the previous evaluations. This meeting is also an opportunity for Residents to review the year and to elicit suggestions and recommendations for improvements to the program.

Midway and at the end of the Residency year, Residents are asked to formally evaluate their rotations and Supervisors. To ensure confidentiality from the Supervisor, evaluations are forwarded to the Director of Clinical Training, who, along with the Professional Practice Leader, can help address identified concerns.

Dispute and Remediation Procedures

Full dispute and remediation procedure details can be found in "The Identification and Management of Resident Performance and Concerns" policy document, which is provided at the outset of the residency.

In the event of resident performance issues, as identified by the supervisor or other members of CBT Associates, the supervisor will first discuss any concerns with the resident. Informal remediation procedures would be discussed and implemented. If concerns persist, the Director of Training, and/or the Professional Practice Leader may wish to meet with the resident to discuss further remediation and training options, at

which time, a formal written description of the issue, as well as a performance remediation plan would be initiated.

In the event of difficulties or concerns with any aspect of the residency program, residents are encouraged to contact their supervisors to determine an appropriate plan to resolve the issue. Should the supervisor be unable to resolve the issue, the resident may contact the Director of Training, or the Professional Practice Leader. Should the issue be related to matters involving the training director or professional practice lead, the resident may approach the other Clinical Directors.

Residents will have the opportunity to discuss and appeal any decisions made by the Director of Training related to these matters.

Accreditation

The CBT Associates Clinical Residency Program is a member of the Association of Psychology Postdoctoral and Internship Centers (APPIC - Program Member Code #1870). Our National Matching Service (NMS) match number is # 187011. We are also a member of The Canadian Council of Professional Psychology Programs. The Residency Program is not currently accredited by the Canadian Psychological Association (CPA). We anticipate applying for accreditation during the 2018-2019 academic year.

The CPA Accreditation Office can be found at the address below:

[Office of Accreditation – Canadian Psychological Association](#)

141 Laurier Avenue West, Suite 702

Ottawa, Ontario

K1P 5J3

Phone: 1-888-472-0657; (613) 237-2144

Email: accreditationoffice@cpa.ca

Stipend

For the full Academic year, full time Residents will receive a stipend that will consist of \$35,000, paid in biweekly installments. Full time Residents will also receive a conference attendance allowance of \$1,000, and will be provided with \$500 to purchase relevant training manuals. Client billing, or number of clients seen, have no effect on resident compensation or evaluation.

Residents will receive 15 working days of vacation and 5 business days to attend conferences, defend their dissertation or attend job interviews. Specific dates will be determined between the Resident, supervisor and Director of Clinical Training.

Application Process

Qualifications

All candidates must be enrolled in a CPA or APA accredited Clinical Psychology Doctoral program, or equivalent, and have completed some CBT coursework prior to application submission. Three Resident positions are currently available.

Prior to commencing the Residency, Residents must have completed all requirements of their doctoral program, excluding the completion of their dissertation. A minimum of 600 practicum hours, including at least 300 direct client contact hours (i.e. assessment and/or group and individual treatment), will also be required. Practicum experience with diverse clinical populations, and treatment using CBT, are preferred.

Applicants will be required to provide a cover letter, along with their application, outlining their training goals for the Clinical Residency, including two to three supervisors of interest. The cover letter should also describe their interest in working at CBT Associates, the rationale behind their didactic and practicum training experiences, as well as how these experiences will prepare them for the Clinical Residency Program. Applications will be submitted electronically through the APPIC online application system (see below), and will be reviewed by the Clinical Directors at CBT Associates. Top rank-ordered applicants will be offered an interview, either by phone or in person, depending on Resident and Supervisor availability.

CBT Associates is committed to offering equal opportunity employment and encourages applications from all qualified individuals regardless of race, religion, cultural or ethnic background, gender, sexual preference, and disability. The program will make all efforts to ensure program access to those with disabilities by ensuring the accessibility of the physical site and by making further necessary accommodations on a case-by-case basis through liaison with the Director of Training and Professional Practice Leader.

Applications:

The deadline for receipt of applications is November 2, 2018.

Applicants must register for the Residency Match, using the online registration system on the Match website: <http://www.natmatch.com/psychint>

Applications are to be submitted using the AAPI Online Centralized Application Service. Please do not mail any printed documents to CBT Associates. The AAPI Online may be accessed at <http://www.appic.org> by clicking on “AAPI Online.”

Applications for the CBT Associates Clinical Psychology Residency should include:

- (1) APPI Online Application
- (2) Cover Letter
- (3) Graduate Transcripts
- (4) Curriculum Vitae, including educational background, clinical experience, research experience, administrative experience, publications and presentations, awards and scholarships, and relevant workshops and seminars taken.
- (5) Three letters of reference, including from one individual familiar with the applicant’s research skills, and another individual familiar with the applicant’s clinical skills. Referees must use the APPIC Standardized Reference Form (SRF). Please ensure that you have informed your referees about this requirement.
- (6) Supplemental Material: A case conceptualization of an assessment and treatment of a client. This should include the presenting problem, relevant background information, psychodiagnostic and/or psychometric testing, CBT case conceptualization, and treatment progress, including specific interventions.

The interview notification date will be December 7, 2018. Interviews will take place between January 9 and 23, 2019.

Clinical Supervisors

Dr. Rixi Abrahamsohn, Ph.D., C. Psych.

Available to supervise Residents in the Adult Mental Health Rotation

Dr. Rixi Abrahamsohn received her Ph.D. in psychology from the Ontario Institute for Studies in Education at the University of Toronto. She completed her predoctoral residency training at the Centre for Addiction and Mental Health (CAMH) in the Mood and Anxiety Program. Her areas of interest and expertise include diagnostic assessment and the treatment of mood and anxiety disorders. Dr. Abrahamsohn has extensive experience providing cognitive behavioural therapy (CBT) in a variety of inpatient and outpatient settings.

At CBT Associates, Dr. Abrahamsohn provides individual treatment for adults with social phobia, panic disorder, generalized anxiety disorder, obsessive-compulsive disorder, post-traumatic stress disorder, depression, and interpersonal and relationship issues.

Dr. Abrahamsohn is a member of the College of Psychologists of Ontario (CPO), Canadian Association of Cognitive Behavioural Therapies (CACBT) and the Ontario Psychological Association (OPA). Dr. Abrahamsohn is also CACBT-ACTCC Certified in Cognitive Behavioural Therapy.

Dr. Khush Amaria, Ph.D., C.Psych., Senior Clinical Director

Available to supervise Residents in the Adult Mental Health and the Child/Adolescent Mental Health Rotations

Dr. Khush Amaria joined CBT Associates in 2008 as a Clinical and Health Psychologist in supervised practice, while working full-time at the Hospital for Sick Children (SickKids). In Dr. Amaria's most recent role at SickKids (2010-2018), she served as the Team Lead for the Good 2 Go Transition Program—a hospital-wide consultation and program development service in the field of healthcare transitions. In this position, Dr. Amaria worked to build evidence-based practices that supported the transition and empowerment of youth with special health care needs through, both their own development, and the health care system.

In September 2017, Dr. Amaria increased her time at CBT Associates to serve as the interim Clinical Director of the Child and Adolescent Program. As of September 2018, Dr. Amaria transitioned full-time into the role of Senior Clinical Director, while continuing to lead the Child and Adolescent Program.

Dr. Amaria provides treatment for children, adolescents, and adults with anxiety disorders, depression, adjustment difficulties, parent-child relational difficulties, and other health- and coping-related problems. As part of her interest in community outreach, Dr. Amaria is involved in supporting parents, educators and caregivers on a variety of topics related to general child and adolescent development, mental health in children and youth, social skills and risk-taking behaviours in adolescence. She has been invited to teach workshops on cognitive behavioural therapy (CBT) for children, adolescents and adults to mental health care providers across Ontario.

Dr. Amaria is a member of the College of Psychologists of Ontario, Canadian Association of Cognitive and Behavioural Therapies (CACBT-ACTCC) and the Ontario Psychological Association (OPA). She is credentialed as a CACBT-ACTCC Certified Cognitive Behavioural Therapist.

Dr. Virginia Boquiren, Ph.D., C.Psych.

Available to supervise Residents in the Adult Mental Health and BEACON rotations

Dr. Virginia Boquiren completed her Ph.D. in Clinical Psychology at Rosalind Franklin University, Illinois, USA. She completed her predoctoral internship at Vancouver Coastal Health, in the Health Psychology specialty track. Her professional experiences offered a wide breadth of clinical training, working with adults coping with various physical and mental health issues. In terms of clinical expertise, Dr. Boquiren is trained in conducting psychological/psychosocial assessments, and has extensive experience in cognitive behavioural therapy, in both inpatient and outpatient settings. She is also trained in dialectical behaviour therapy, mindfulness, as well as in providing psychoeducation and supportive group psychotherapy.

Dr. Boquiren completed a number of research pre-doctoral and a postdoctoral fellowship, focusing on coping, adjustment, and quality of life individuals coping with chronic illness, particularly cancer. Her research areas of interest include psychosocial, gender, and other factors impacting body image, sexual health and functioning, and wellbeing in cancer survivors, their caregivers and loved ones.

At CBT Associates, Dr. Boquiren provides individual treatment for adults, focusing on anxiety disorders, depression, and adjustment difficulties, particularly coping with chronic illness.

Dr. Boquiren is a member of the College of Psychologists of Ontario, Canadian Psychological Association, and Canadian Association of Cognitive and Behavioural Therapies.

Dr. Maddy Burley, Ph.D., C.Psych.

Available to supervise Residents in the Adult Mental Health Rotation

Dr. Maddy Burley completed her Ph.D. in clinical psychology at Ryerson University. She completed her predoctoral clinical residency with the Northern Ontario Psychology Internship Consortium (NORPIC). During her residency, she worked in inpatient and outpatient settings at St. Joseph's Care Group in Thunder Bay, Thunder Bay Regional Health Sciences Centre, and the Children's Centre of Thunder Bay.

She has previously completed training experiences in the Schizophrenia and Dual Diagnosis Programs at the Centre for Addiction and Mental Health, and in the Department of Family and Community Medicine at St. Michael's Hospital in Toronto. She has also previously worked in private practice providing treatment for children with anxiety.

Dr. Burley enjoys working with people from all walks of life and believes that the best therapeutic outcomes are achieved when evidence-based practice is provided in the context of a genuine, caring and respectful relationship between client and therapist. At CBT Associates, she provides evidence-based assessment and treatment for adults with schizophrenia or psychosis, mood disorders, anxiety disorders, and health concerns such as chronic pain, cancer, and other chronic illnesses. She also has experience with issues such as bereavement, trauma, adjustment to major life transitions, and stress.

Dr. Burley has extensive training in CBT and integrates techniques and philosophies from other evidence-based treatments such as Mindfulness Based Cognitive Therapy and Dialectical Behavior Therapy as needed.

Dr. Burley is a member of the College of Psychologists of Ontario (CPO), the Ontario Psychological Association (OPA) and Canadian Association of Cognitive and Behavioural Therapies (CACBT). Her research interests include: cognition, depression, psychotic disorders, anxiety, and chronic pain.

Dr. Janine Cutler, Ph.D., C.Psych.

Available to supervise Residents in the Adult Mental Health Rotation

Dr. Janine Cutler graduated in 1994 with a Ph.D. in clinical psychology from the University of Manitoba. Dr. Cutler works with adults and provides individual, couples and group therapy. She has been providing clinical services in a private practice setting since 1988. For the past 20 years, she has specialized in the areas of clinical and forensic psychology.

While residing in Manitoba, Dr. Cutler worked as a Program Manager at the Canadian Mental Health Association, prior to working at Stony Mountain Institution as the Mental Health Psychologist and then the Senior/Chief Psychologist. Subsequent to leaving Stony Mountain Institute, Dr. Cutler worked full-time in a private practice clinic. After moving to Ontario in 2006, Dr. Cutler worked at Whitby Mental Health Centre prior to taking the position of Chief of Psychology at the Ontario Correctional Institute, which is a treatment facility. She then became the Senior/Chief Psychologist at Grand Valley Institution for Women and returned to full-time work within a private practice setting in 2010.

Dr. Cutler has expertise in conducting psychological, medical-legal, and psychological risk assessments. She also has experience and an interest in the treatment of anxiety and mood disorders; personality disorders; physical, emotional and sexual abuse; post-traumatic stress; loss and grief; relationship issues; domestic violence; anger and emotion management; stress management; mindfulness; work-related issues and substance use. Dr. Cutler has widely used cognitive behavioural therapy (CBT) within the mental health and correctional systems and in private practice. She also has training in dialectical behavioural therapy (DBT) and has been trained to provide workshops and training in the area of compassion fatigue and vicarious trauma.

Dr. Cutler is a member of the College of Psychologists of Ontario (CPO), the Ontario Psychological Association (OPA), the Canadian Psychological Association (CPA), the Canadian Association of Cognitive and Behaviour Therapies (CACBT), the Canadian Register of Health Service Providers in Psychology (CRHSPP), and the Association of State and Provincial Psychology Boards (ASPPB) Mobility Program.

Dr. Laura Cuttini, Ph.D., C.Psych

Available to supervise Residents in the Adult Mental Health rotation(s)

Dr. Laura Cuttini received her Ph.D. in Clinical Psychology from McGill University. She completed her predoctoral internship at the Allan Memorial Institute in the CBT Service and the Herzl Family Practice Centre in the Teen Health Unit, specializing in mood and anxiety disorders. She has also completed training with Kahnawake Shaktiia'takehnas Community Services, the CBT Service at the Jewish General Hospital, and the McGill Mental Health Service.

Dr. Cuttini has extensive experience treating adolescents and adults with cognitive behavioural therapy (CBT). She has also received training in other approaches such as acceptance and commitment therapy (ACT), dialectical behaviour therapy (DBT), motivational interviewing, and mindfulness.

At CBT Associates, Dr. Cuttini specializes in treating adolescents and adults, and works with a variety of issues including mood and anxiety disorders, OCD, stress, and insomnia.

Dr. Cuttini is a member of the College of Psychologists of Ontario (CPO), the Ontario Psychological Association (OPA), the Association for Behavioral and Cognitive Therapies (ABCT), and the Canadian Association of Cognitive and Behavioural Therapies (CACBT).

Dr. Megan Davidson, Ph.D., C.Psych.

Available to supervise Residents in Adult Mental Health Rotation

Dr. Megan Davidson received her Ph.D. in Clinical Psychology from Queen's University. She completed her predoctoral training at the Centre for Addiction and Mental Health (CAMH) in the Mood and Anxiety Program and the Eating Disorder and Addiction Program. Dr. Davidson has extensive experience providing cognitive behavioural therapy (CBT) in a variety of outpatient and inpatient settings, and she has conducted research on the psychological influences on health, illness, chronic pain, and responses to those states.

At CBT Associates, Dr. Davidson specializes in treating adults, focusing primarily on depression, anxiety, eating disorders, and post-traumatic stress disorder.

Dr. Davidson is a member of the College of Psychologists of Ontario (CPO), the Association for Behavioral and Cognitive Therapies (ABCT), the Academy for Eating Disorders (AED), and the Ontario Psychological Association (OPA).

Dr. Julie Erickson, Ph.D., C.Psych.

Available to supervise Residents in Adult Mental Health Rotation (including Older Adults)

Dr. Erickson completed her Ph.D. at the University of Manitoba and her pre-doctoral residency at the Centre for Addiction and Mental Health (CAMH) in Toronto. She brings a breadth of experience working in a number of different settings such as hospitals, universities, private practices, and correctional facilities. Dr. Erickson's clinical experience is primarily with individual and group cognitive-behavioural therapy for mood and anxiety disorders, obsessive-compulsive disorder, and trauma-related disorders. She also has experience with dialectical behaviour therapy (DBT) and mindfulness-based cognitive therapy (MBCT). She has a special interest in working with older adults, as her research has focused on understanding the psychological and social needs of this population and improving their access to mental health care.

Dr. Erickson hopes that her clients leave feeling empowered, supported, and better situated to make meaningful changes in their lives.

Dr. Erickson is a member of the College of Psychologists of Ontario (CPO).

Dr. Peter Farvolden, Ph.D., C.Psych., Senior Clinical Director

Available to supervise Residents in the Adult Mental Health, the Child/Adolescent Mental Health and the BEACON Rotations

Dr. Farvolden became interested in Clinical Psychology when he worked as a Child and Youth Worker at a Residential Treatment Centre for Children and Adolescents. He was impressed enough by the transformative power of talk therapy to pursue a PhD in Clinical Psychology from the University of Waterloo, where he received his initial training in the scientist-practitioner model and evidence-based treatment.

Dr. Farvolden has worked as a researcher, clinician and administrator in a wide variety of inpatient and outpatient settings, including the Hamilton Health Sciences Centre, The University Health Network, and the Centre for Addiction and Mental Health (CAMH). He holds university appointments in the Department of Psychiatry at the University of Toronto and the Departments of Psychology at the University of Waterloo and Ryerson University. In his research, he has focused on basic processes in personality and psychopathology as well as the pharmacological and psychological treatment of mood and anxiety disorders.

As a scientist-practitioner, his clinical practice is guided by the best evidence provided by current research on what works best for whom. He is passionate about delivering sensitive, compassionate, informed and effective treatment and believes that great things happen when we strive to integrate the best research and evidence with our clinical expertise and our clients' values. Dr. Farvolden believes strongly that people receive the best care in the context of a large team of like-minded professionals who hold each other to the highest standards.

At CBT Associates, Dr. Farvolden provides cognitive behavioural therapy (CBT) for children, adolescents, and adults with anxiety disorders, depression, and stress-related problems. He provides supervision to psychologists during their supervised practice year with the College of Psychologists of Ontario (CPO) and peer consultation to his colleagues at CBT Associates. He gives inspired talks to a variety of audiences, including communities, professionals, and employers.

Dr. Farvolden is a member of the College of Psychologists of Ontario (CPO), the Association for Behavioral and Cognitive Therapies (ABCT), the Anxiety Disorders Association of America (ADAA), the Canadian Psychological Association (CPA), the Canadian Association of Cognitive Behavioural Therapy (CACBT), and the Ontario Psychological Association (OPA).

Dr. Katelyn Gomes, Ph.D., C.Psych.

Available to supervise Residents in the Adult & Couples Mental Health rotation(s), and BEACON (Assessment) Rotations

Dr. Katelyn Gomes received her Ph.D. in Clinical Psychology at Lakehead University. She completed her predoctoral internship at St. Mary's of the Lake Rehabilitation Hospital, Adult Mental Health at Providence Care Hospital, and KidsInclusive at Hotel Dieu Hospital.

During her predoctoral training, she specialized in assessing and treating adults with mood and anxiety disorders, as well as learning disabilities, and cognitive and emotional symptoms associated with brain injury. Some other professional experiences include positions at St. Joseph's Care Group, Thunder Bay Regional Health Sciences Centre, and the Mood and Anxiety Disorders Program at the Mental Health Outpatients Clinic in Thunder Bay.

At CBT Associates, Dr. Gomes provides assessment and treatment services for adults and couples. She provides treatment for relationship and marital difficulties, depression and low mood, generalized anxiety, social anxiety, stress, panic attacks, ritualistic behaviour, obsessive thoughts, and situational/life stressors. Dr. Gomes' approach to therapy is personalized based on individual needs, and that of support, collaboration and empowerment.

She has a caring attitude, open-mind, and inherent compassion that focuses on helping people build upon their strengths and move towards achieving and maintaining positive changes in their lives. Treatment sessions focus on exploring what is currently getting in the way of productivity, relationships and happiness, and developing skills to tackle future challenges with confidence.

In addition to working from a Cognitive Behavioural Therapy (CBT) framework, she applies elements of Mindfulness, Emotion Focused Therapy (EFT), Acceptance and Commitment Therapy (ACT), and Dialectical Behaviour Therapy (DBT) when appropriate. She believes in utilizing evidence-based approaches that are tailored to each individual's needs.

Dr. Gomes is a member of the College of Psychologists of Ontario (CPO).

Dr. Leorra Newman, Ph.D., C.Psych.

Available to supervise Residents in the Adult Mental Health rotation(s)

Dr. Leorra Newman received her Ph.D. in Clinical Psychology from Ryerson University. She completed her predoctoral clinical internship at Sunnybrook Health

Sciences Centre and North York General Hospital, with specializations in treatment of obsessive compulsive disorder, eating disorders, and psychological effects of cancer diagnoses or treatment. Dr. Newman has also received clinical training at St. Michael's Hospital (Department of Family and Community Medicine), the Centre for Addictions and Mental Health (Psychological Trauma Program and Alternate Inpatient Milieu), and at Ryerson University (Sleep and Depression Lab and Anxiety Research and Treatment Lab).

Dr. Newman has conducted research on mindfulness approaches to anxiety and factors affecting individuals' treatment choices for anxiety-based problems, as well as neuroscientific research on memory and sensorimotor function.

At CBT Associates, Dr. Newman provides assessment and cognitive behavioural therapy for a variety of anxiety, mood, stress-related, and physical concerns, as well as insomnia. She has experience incorporating approaches that include mindfulness, distress tolerance, and emotion regulation skills such as Acceptance and Commitment Therapy (ACT) and Dialectical Behaviour Therapy (DBT). Treatment is tailored to individual clients' needs.

Dr. Newman is a member of the College of Psychologists of Ontario (CPO).

About Toronto

Toronto is Canada's largest city and home to one of the most culturally diverse populations, consisting of over 2.8 million people. The city is a jewel on the shore of Lake Ontario. It is sometimes referred to as the "New York City of Canada" because of the range of activities, entertainment, diversity and environment.

Toronto has a variety of exciting places and events to see. The variety of museums, such as the Royal Ontario Museum, the Art Gallery of Ontario, and the Ontario Science Centre can fill a day with fun and adventure.

One of the most well-known structures in the world that graces Toronto's skyline is the CN Tower. It measures a height of 553.33 meters and is known as "Canada's National Tower". With its glass floor and revolving restaurant at the top, it offers spectacular views of the city. Situated next to the CN Tower is one of the most dynamic entertainment centers in the world – Rogers Centre, home to the Toronto Blue Jays. The Rogers Centre hosts over 200 events yearly and is known for its retractable roof. In addition, Toronto has many parks and beautiful beaches that can provide a peaceful escape from the city life. Less than two hours away is Niagara Falls and the American Border, for weekend road trips.
